**BIBLIOGRAPHY DIVISION
LIBRARY, U. S. DEPT. OF AGRICULTURE
WASHINGTON 25, D. C.**

HIDDEN VALLEY NURSERY is off Meyersville Road, between Gillette and Meyersville, 25 miles due west of the Statue of Liberty. Go to the intersection of Mountain Avenue, Meyersville Road, and Long Hill Road, at the top of Long Hill, above Gillette. Look for the **HIDDEN VALLEY NURSERY** sign two-tenths of a mile down the hill toward Meyersville from this intersection. The nursery is at the end of Sassafras Place, ½ mile off Meyersville Road.

Prices quoted here are net cash for materials F.O.B. the nursery.

The caliper, where given, determines the price. The figures in parentheses indicate the approximate height of the trees.

Specially selected specimens will be sold at prices higher than listed, according to the quality of the plants chosen.

This list cancels all previous lists. Prices are subject to change without notice.

The roots of **HIDDEN VALLEY NURSERY** trees are never exposed to the sun or air even for short periods. As soon as dug, the trees are thoroughly heeled in, — actually replanted, with all roots in contact with moist soil, — where they remain until you call for them. This is one of the reasons why our customers come back year after year.

You are invited to visit **HIDDEN VALLEY NURSERY** to inspect the trees.
